

GTF

**Good for the earth,
good for people,
good for business.**

Our Technology

**The GTF RENU™ System
is more efficient and
effective than other
drying methods:**

- **Simultaneous Drying & Milling**
- **Lower Moisture Content**
- **More Energy Efficient**
- **Retains Nutritional Value**
- **Smaller Footprint**
- **Supports Clean-Label Foods**
- **Ultrafine Particles**

Our Powders

...and seconds later,
the transformation!

Before

In mere seconds, our technology transforms excess food and other plant materials into stable, nutritious, and valuable powders.

Why GTF powders are superior:

- Nutrient-Dense
- High Sensory Profile
- Extended Shelf Life
- Sustainable

The Problem

World Hunger

As many as

811 million people

in the world go to bed hungry every night.

Food Waste

Nearly

1/2 of all fruits & vegetables

produced globally are wasted each year.

This amounts to about

1.3 billion tons per year

worth approximately \$1 trillion.

All the food produced but never eaten would be sufficient to feed 2 billion people.

That's more than twice the number of undernourished people across the globe.

Our Solution

We reduce waste, nourish people, and boost bottom lines by gleaning excess and underused resources.

Our innovative technology transforms these excess resources into nutritious, profitable powders.

We bridge the gap between producers and consumers to create a circular economy.

Our Process

1

Food producers with excess byproducts, side-streams, or waste

2

GTF RENU™ System powderizes excess resources

3

Purchasers use GTF powder to create secondary revenue streams and increase profit

4

Customers and consumers benefit from the final product

Our Pillars

Sustainability

We make food production and processing more eco-friendly.

Technology

We believe technology is integral to our vision.

Connection

Our network of connections enables successful business opportunities.

Giving

At the heart of our work is a desire for worldwide food equity.

Markets We Serve

Food Processing

Brewers Spent Grain

Hemp & Biomaterials

Post-Consumer Food Waste

Large Scale Composters
